

## About Us

We are a small group of Apple computer users, keen to improve our abilities by supporting and guiding one another, sharing ideas, knowledge and skills, in a happy, friendly environment.

Our members range from new Mac users, to very experienced and skilful users, keen to assist, and learn from others.

We meet monthly, having a short formal meeting followed by a special presentation on some aspect of Mac computing. The exact topic for this presentation is basically determined by members. Our emphasis is on having a good time with friends.

The Club has three basic aims: providing assistance, disseminating information and effectively combining our knowledge of computer activities.

Some members travel from as far away as Warwick to attend our meetings; we have other members who actively keep in email contact with us. We welcome all who are interested in Apple products and Macintosh computers in particular. Come along and try one of our meetings.
